Flow with Confidence

Confidence flows where perfection begins. At Corsia, we don't just create bath products — we craft experiences that embody quality, design, and durability.

Our journey now continues with Sonakshi, who represents everything we stand for — Strength, Style, and a spirit that never fades.

Step into a world where every drop reflects brilliance.

A stylized, handwritten signature in blue ink. The signature is fluid and cursive, with the name "Sonakshi" clearly visible in the center. The signature is written in a way that suggests movement and elegance.

A PLACE, WHERE IDEAS
TAKE SHAPE.

WELCOME TO CORSA

The Global
Design Partner

A Legacy of Innovation & Excellence

Mind Behind Corsa

The visionary Founder and Managing Director of CORSA has built the company on a foundation of innovation, excellence, and integrity. The journey began in 1996, and with relentless dedication, the leader behind CORSA mastered Sales & Marketing, Overseas Business Development, Client Relations, Project & Strategic Planning, Financial Management, and Import & Export.

Expertise in raw materials, cutting-edge technologies, and advanced innovations in bathroom products has positioned CORSA as a trailblazer in the industry. Through extensive global research, state-of-the-art automated machinery has been introduced, ensuring the production of exceptional and unmatched products a rarity in India. Today, CORSA stands as a brand that not only dominates the domestic market but also exports to several countries worldwide.

However, the journey of success is never accomplished alone. The strength of CORSA lies in its people a passionate team that shares the same vision of quality, innovation, and customer satisfaction. Under inspiring leadership, CORSA has cultivated a culture that values creativity, collaboration, and continuous improvement.

With strategic foresight and deep industry expertise, CORSA continues to achieve new milestones, setting benchmarks in the sanitaryware and bathroom solutions industry. Guided by a commitment to excellence and a forward-looking approach, the brand is poised for a future defined by growth, sustainability, and global recognition.

SABKA BHAROSA
CORSAL

The Next Generation : Carrying the Legacy Forward

As CORSA continues to grow, the next generation has stepped in to infuse fresh energy and forward-thinking innovations. The new leadership team has become an integral part of the organization, bringing with them modern perspectives, technological advancements, and an ambitious vision to elevate CORSA to even greater heights.

Their involvement marks a new era where experience meets innovation blending the company's strong legacy with contemporary ideas. With this dynamic leadership, CORSA is poised to continue leading with excellence and remain at the forefront of the industry, both in India and across global markets.

Innovation driver and first mover

To further promote the topic of sustainability in the Bath Fitting industry, we at Corsa are also focusing on forward-thinking ideas and concepts for production.

Technology

Man may not have survived if fire was not discovered. Mankind may have stagnated if wheel was not invented. Humans would still have been nomadic, if agriculture was not found. These may have been rudimentary technologies, but their impact in transforming humanity has been phenomenal.

The fact that technology helps humanity transform, evolve and grow is not lost on us. Hence, we always value technology and encourage innovation. In fact, technology is our man Friday and innovation is our middle name.

We are proud of the non-conventional technology that we use along with the latest innovation in digital glazing that helps us produce the never-before seen slabs that are absolutely flat.

Made in India

India has led the world in various fields over the time. We are proud to say that this initiative by Corsa will be counted amongst it. All our designs and products are made in India for the world!

Manufacturing Quality

In its production, CORSA relies on top-quality materials, high-tech design and precision work. Not to mention environmental protection, the efficient use of resources and good working conditions for its workforce. You can purchase these products with complete peace of mind, since they are manufactured sustainably and to a high standard of quality. With around 80 % of our products manufactured domestically, "Made in India" is an integral part of our philosophy.

Pure Brass Ingot - Laying the Foundation

The making of a faucet has many steps and every manufacturing stage is quality controlled. Every stage is important because the quality of the final product rests on the performance of the preliminary steps. So, creating the 'chassis' or foundation of a faucet is as crucial as the final finish. Our faucet bodies are made of the purest possible Brass. Brass, which is an alloy of copper and zinc, is resistant to soft-water corrosion and hard-water calcification making it the perfect metal for a faucet body. 65% less lead.

Core Shooter - Precision at its core

A Core is a device used in casting and moulding processes to produce internal cavities and re-entrant angles. The core is normally a disposable item that is destroyed to get it out of the piece. They are most commonly used in sand casting, but are also used in injection moulding.

Cores are useful for features that cannot tolerate draft or to provide detail that cannot otherwise be integrated into a core-less casting or mould.

Die Casting

The Art of Perfection

The faucet's body is either cut from high-quality brass rods or its shape is achieved through die casting using state-of-the-art technology. We use imported die casting machines, which are unparalleled when it comes to achieving construction quality. Die-cast bodies are made by melting brass at high temperatures 1150°C and pouring it into moulds of the desired shape.

These moulds are such that there is little aberration in the shape of a faucet. This is a must to ensure that the final finish is smooth as a mirror with true reflection

Machining - Precision Redefined

After die casting comes the process of machining. Our cutting-edge machining process ensures that the die casted product has all its surfaces finished to a high degree of smoothness. The internal water passage ways are also smoothed for better performance during machining.

Grinding & Polishing

Reflecting Timeless Brilliance

Only after the brass surfaces are polished to technical precision can the product be sent out to chrome plating. Unless the polishing is perfect the faucet will not get that shine that we look for in every high quality product.

For that perfect finish, polishing is carried out through a combination of manual and machine driven processes. For high-end and niche faucets the polishing is done by experienced artisans. Senior polishing technicians work exclusively on our pride-of-place range.

Eye Testing - Eye Don't Lie

Before the faucet goes to the electroplating lines, all the parts and bodies undergo a physical check for any sort of cosmetic imperfections like scuff marks, polishing errors, geometrical and asymmetrical lines and curves.

This ensures we have less in process rejections at the end of the electroplating process.

Electroplating - An Enduring Glow

Every faucet and mixer system created by CORSA undergoes a chrome plating technique that greatly enhances durability of the product. We proudly use special chemicals on our plating lines.

That's not all CORSA undertake Chrome plating on One of its kind Automatic Electroplating Machine. Automatic electroplating plants offer numerous advantages, including increased production rates, enhanced quality control & minimized environmental impact.

The chrome finish is so fine that it ages very slowly. Hence each box is labeled DIAMOND FINISH for you to enjoy your faucet. Ni 12.50 μ / Cr 00.30 μ

Revolutionary Automatic Electro Plating Plant

Assembly -The Seal of Excellence

At CORSA, we leave no stone unturned in our commitment to quality. A comprehensive quality control system encompasses raw material inspection, process inspection, and finished product inspection. This meticulous approach guarantees that each Corsa faucet surpasses expectations and delivers a mark of excellence.

Pressure & Life Cycle Testing

Every faucet and bath system created and crafted undergoes a rigorous testing process on both water and compressed air. We take proud in saying – each faucet that gets shipped out of the manufacturing facility is tested on imported machine physically by a trained technician,

of Course with this conviction do we offer a 7 year warranty on our products Tested on 0.5 mPa (5 Bar)

Laser Marking - Shown Corsa Originality

Imported machine performs contactless on perfectly engineered faucets to carry the bold CORSA emblem to stay with you forever.

Ready For Dispatch

Only after the test faucets pass these series of trials, they are sent out to the market. Which is why, when you buy our product, you will not need another faucet and bathing system for a long, long time.

METROPOL FLUSH VALVE

Features of Metropol (Water Hydraulic Circuit System)

- This Metropole is design & manufactured and tested with European standard
- The Metropole is work on Push-Type Auto closing system (Water Hydraulic Circuit System)
- Powerful Flushing Capability, Extreme Water Pressure Flow Control
- Easy to Operate & Install
- Maintenance Free Product
- Easy to Repair

HC-05	40mm	1700/-
HC-06	50mm	2800/-

VERTICAL CHECK VALVE

A vertical check valve is a type of non-return valve specifically designed for installation in vertical pipelines where fluid flows upwards. It automatically prevents the backward flow of a medium, such as water, air, or steam, by using a gravity- or spring-actuated mechanism.

Application

- Vertical water supply : Regulates upward water flow in plumbing for high-rise buildings and sanitary systems
- Pumps : Protects vertical discharge pumps in domestic and industrial settings from back flow when the pump shuts down.
- Industrial processes : Controls unidirectional flow of steam in industrial boilers and prevents back flow in chemical pipelines.
- Fire protection: Maintains the pressure integrity of vertical sprinkler pipelines.

Smooth and clear threads, effectively avoid the water leaking.

Honey Brass Valve Body

Stainless Steel Spring : Enhanced Flexibility Long Lasting

Silicon Ring : Not Easy to Scale Good Tightness, No Leakage.
